Healthy homes: healthy families!

In Aotearoa New Zealand, a pandemic of cold, damp, and unhealthy homes is taking its toll on the health of our families.

The spaces where we live and play are making us sick — but with SensorNode-WiFi, we're fighting back! We teamed up with the brilliant minds at He Kainga Oranga to develop a solution that shines a light on the issue.

With SensorNode-WiFi, you're not just protecting your family's health - you're taking control of your indoor environment and creating a home that's safe, comfortable, and nurturing.

Features

- Tiny and discreet
- Battery powered lasting years on 2 x AA cells
- Real-time data for temperature and humidity
- WiFi connectivity, no ongoing costs
- Mobile app for data access anywhere
- Web portal with reporting
- Customisable notifications
- Easy data sharing with friends, family and healthcare providers
- Lowest possible cost.

Benefits

- A warmer home brings a range of health benefits for you and your family. By tracking the temperature and humidity levels, you can prevent the growth of harmful mold and bacteria

- Alleviate allergies and respiratory issues

- Promote better sleep quality

- Provides peace of mind knowing you're breathing cleaner air.
